

You are an enthusiastic professional with excellent soft skills looking to prove these whilst working for one of the leading providers for Payment Services? Take a leap and experience how a mobile device can become a new standard for digital identity verification to bring speed and security to the authentication and onboarding process while improving the UX. We plan to center the mobile phone as the single identifier for all your risk-based assessments.

DIMOCO is a regulated payment institute, holds a payment services act license granted by the Austrian Financial Market Authority and enables over one billion consumers to purchase goods and services from content providers through their mobile devices.

Our international team, shaped by 170 individuals from 20+ nationalities, offers space to add your personal note, combined with direct responsibility and ownership of your projects. Flexible working hours support your work live balance. You are just the person we are looking for if you want to become a vital part of our young, motivated and entrepreneurial team in a modern environment!

Due to the growing demands of our services we are looking to recruit a

Product Owner Identity (f/m/d) **- Risk & Fraud Specialist -**

Your vital role:

In your new role, you will become part of the digital identity team, take on the product and project management of digital identity projects. You are largely responsible for the development of tools for reducing risk & fraud in the online ecosystem as well as defining solutions that help to secure the identity authentication process while at the same improving the UX.

This role is ideal for someone who feels at home in the digital world and wants to contribute with his or her creativity and an innovative spirit. Experience in the payments or Online Fraud Prevention (OFD) industry is required for this role, which you have gathered while working for a PSP, acquirer, issuer, bank institute or a Fraud detection company.

We will trust you with:

- You will champion product initiatives and business cases to executive management for prioritization and development
- Build understanding of customer acquisition to drive investment in features that create business
- Drive the long-term product vision and key drivers of the product strategy
- Map the product vision and market input to a foundational set of API capabilities
- Build and prioritize the pipeline for product development
- Gather and structure customer feedback on products
- Lead product development and delivery through an Agile Methodology
- Define and manage pricing for product lines ensuring maximum commercial impact
- Monitor product performance and define commercial countermeasures as needed to address gaps
- Coordinate delivery of sales tools and training as needed
- With your proven track record of successfully managing products to meet aggressive growth targets you will develop and manage the product pricing strategies

Your expertise includes:

- Excellent understanding of digital identity and digital risk products
- You have a strong quantitative background to support data-informed decision-making.
- Understanding the value of building products that can be adapted for a variety of uses
- You have excellent communication skills and excel at translating customer problems & ideas into technical product requirements. It's important that you can work closely with engineers to evaluate different approaches to implementing product features, weighing cost/benefit trade-offs especially for developer APIs that we expose to our customers for integration
- You show professionalism, feel at ease in complex environments and can influence multiple stakeholders without direct authority
- Ideally you hold a Master's Degree in Business combined with Computer Science
- At least you have 3 years product management experience in building Fraud, Risk and ML solutions
- You have worked for several years with tech teams in an agile environment and in a cross-functional and global environment
- With your excellent verbal and written communication skills you have the ability to articulate and present complex concepts

You will enjoy:

- The chance to leave your personal mark and lead the company into a new digital area
- Performance driven team spirit and self-motivated working environment – passion and creativity are the drivers in our fast-paced company
- Interesting challenges within a multi-cultural environment
- A growing and forward-looking industry in the field of payments
- Modern office facilities, located in the south of Vienna
- Flexible working hours
- Recognition for your achievements and your proactive approach
- A competitive remuneration package

Due to legal reasons, we are obliged to disclose the minimum salary according to the collective agreement for this position, which is € 50.961 gross per year. However, our attractive compensation package is based on market-oriented salaries and is therefore significantly above the stated minimum salary.

One application – a billion opportunities!
